RESEARCH INTEREST

Music Informational Retrieval, Natural Language Processing, Multi-Modal Deep Learning

My research focuses on machine's ability to listen to music, express music experience in natural language, and imagine visuals. My research primarily revolves around the field of representation learning between music and multimodal media. The detailed task is as follows:

- Annotation: Auto-Tagging, Captioning
- Retrieval: Cross-modal Music Retrieval, Conversational Music Retrieval
- Generation: Music Conditioned Media Generation
- Music Representation Learning: Self-supervision, Disentanglement
